About Us

BLAKGOLD is a one-of-kind global music production, songwriting and Dj group consisting of two members from different backgrounds and countries. They are “Cylenz” of Trinidad and “The Wixard” (daughter of reggae royalty Beres Hammond) from Jamaica. The duo has a truly unique and global perspective on music culture, enabling a creative process that has in a short space of time allowed them to record with artists spanning the globe.

OUR Mission

To create music that bridge cultural gaps between the mainstream and the underground sectors of the industry. We intend to challenge genre borders while allowing ourselves the creative freedom to have fun in the process. BLAKGOLD wishes to provide access for various artists globally, connecting and creating music that fosters pride in the work, establishing fair practices and camaraderie amongst all.

We love using music, technology, film and art as conduits to communicate with and experience the world. Our artistic participation helps to teach us about ourselves and in the process hopefully touch the hearts of others. We are blessed to be able to send a message of awareness, unity and self expression through our own creativity.

“

**WE BELIEVE
IN FREEDOM
OF EXPRESSION.**

Committed to the NEW

Updates

Fresh off their appearance on the main stage at ULTRA MUSIC FESTIVAL Miami and the production of their hit track with Bunji Garlin, the crew continued to produce music with global collaborations including Deb's Daughter which united a unique collaboration between her and Zebulun (Trinidad). They also completed a 6 track EP in South Korea for GoldTea under YG's Big Bang Seungri's label, Natural High Record (NHR). Whilst in Asia they also rocked Club Octagon (Ranked Top 5 clubs by DJMag), Club Mass and Monkey Museum. As other international collaborations continue to be in the works for the group – including Le Twins (Mexico), Mr Killa (Grenada), Juan Fe Pulido (Columbia), Que & Musiholiq (South Africa), Freetown Collective (Trinidad); the duo's music reflects the continued globalization of the art form and its ability to excite the masses.

BLAK
GOLD

As a group, BLAKGOLD stands as an example of how individuals from different countries can work together using technology, and a common goal to express their own eccentric positive energy. With collaborations from artists of twelve different countries (and counting!), the duo hopes to show that no matter where you are in the world, with a little love, understanding, and outside-of-the-box thinking, one's creativity can leave a lasting impact on culture everywhere.
